

HIGGS & JOHNSON
Named in *Euromoney* Private Banking Survey 2008
Top honours a good start to firm's anniversary year

Leading Bahamas-based law firm, Higgs & Johnson, which celebrates its 60th anniversary in 2008, kicked off a year of celebration with the announcement that it had gained three spots in *Euromoney* magazine's Private Banking Survey 2008.

For the second consecutive year Higgs & Johnson was ranked first in "inheritance and succession planning – Caribbean". Other accolades included the highest Bahamian law firm ranked for "tax guidance and services – Caribbean" and the only Bahamian law firm ranked for "corporate advisory for private banking clients – Caribbean".

Euromoney's renowned annual survey of the wealth management industry, now in its sixth year, provides a qualitative and quantitative review of the best services in private banking by region and by areas of service. It is an informative guide for high net-worth individuals on the range of service providers that are available. The survey includes peer and competitor perceptions with the highest ranked firms recognised as the top service providers in their respective niches.

Said H&J Managing Partner John K. F. Delaney: "This award is great recognition for the hard work put in by every member of our Private Wealth Management Group. We are very proud that the firm's efforts have been recognised by our clients and the industry at large. What an excellent way to begin the year."

In 2008, for the second consecutive year Higgs & Johnson was ranked first in "inheritance and succession planning – Caribbean" by *Euromoney* magazine's Private Banking Survey.
